Stock & Option Solutions Hosts SOS Educational Webcast: Adding Access to your Stock Plan Professional Quiver

MS Access basics are broken down and explained in the context of managing equity compensation programs

Campbell, California, May 26, 2015 - Stock & Option Solutions (SOS), a leading provider of stock plan outsourcing, temporary staffing and consulting services, today announced their upcoming webcast, Adding Access to your Stock Plan Professional Quiver, is scheduled for June 23, 2015 at 11am PT.

Steve Gaylord and Srinivas Kalakoti, both of SOS, will delve into some of the more common uses of MS Access. The how-to's of getting started with a blank database, linking to external data, creating queries, and more are explained in detail in this educational webcast.

Gaylord says, "In previous webcasts we have reviewed Excel and ways to help reduce risk and automate some recurring processes, but Excel is not the only data-focused application in the MS Office suite. MS Access also provides robust data structure and many of the same functions available in Excel and many more. We have found that many stock plan administrators shy away from MS Access because they feel it is too complex. In this webcast, we will share some of the basic features of MS Access to attempt to demystify people's apprehension, and we will review additional ways to solve everyday problems."

For more details on the above webcast, please contact Shawna Casey at scasey@sos-team.com or 408-979-8700.
